Dom,

Can you send me the most recent version of the draft well construction response to comments ? I know that what you've been working on isn't complete, but Gary Foley is interested in what we have prepared so far. Following yesterday's API briefing, EPA and ORD Senior Management had questions on how ready we were to respond. I told them that we also were concerned about being prepared with a response and that you have been working hard developing responses to specific questions . Gary wanted this information so that he could read it and communicate it up the management chain .

Gary may be talking with Senior Management early next week and he wanted to get the draft responses as soon as possible. He realizes it is still draft and that you are still working on it . I wasn't sure what you had with you on the road or how soon you could send anything. But I'm supposed to find out. Let me know how soon you could send something.
